

## Säkert Företag, the company

Säkert Företag was started in 1996 and is comprised of consultants with backgrounds from the police and the rescue services and of financial, IT and environmental consultants. We work with company and public administration security issues from the management level down to detail issues such as locks and surveillance. Security work is subdivided into preventative security, damage limitation, crime investigation and training within a number of security areas.

## Business idea

Säkert Företag is an independent consultancy that analyses and measures risk and threats for Swedish clients, generating through this process increased productivity and quality.

## Vision

Säkert Företag will be the security service supplier of choice for large companies, organisations and administrations.

## Security

### - An investment in the future

Development in society and the associated dependence of businesses and public administrations on technology represents increased vulnerability. Successful companies use new technology to maintain and increase their competitiveness. The consequences of environmental accidents, fires, computer crashes, unauthorised distribution of information or manipulation of computer systems to damage or hide criminal actions can be devastating.

A company adapted risk and security analysis, including damage prevention and damage limitation measures, reduces the risk of damage and builds security in both your company and your brand.

Sometimes that which shouldn't happen, happens. For example, employees carry out criminal actions that can seriously damage or destroy a company. Through quickly and discreetly bringing in search and investigation work, damage can be limited and negative publicity avoided.

Working with Säkert Företag will mean that you can be sure that your company or administration will quickly, discreetly and safely gain control of security, in areas from personnel issues to forms of physical security, in development, production, service, warehousing and distribution.

Welcome to Säkert Företag!

A handwritten signature in black ink, which reads "Niels-Tore Sögaard". The signature is written in a cursive, flowing style.

## Our services

We are by your side before it happens,  
when it has happened and when it won't happen again!

### **Limit the damage**

When damage has inflicted, the damage incurred is often greater than initially thought. It is very important to start investigation work, residual valuations and reconstruction work as soon as possible.

Säkert Företag contributes by limiting damage, through providing the resources that the task requires. Reacting quickly also limits the risk of negative publicity.

### **Investigate and clean up**

A thorough investigation requires time, resources and substantial knowledge. Through engaging Säkert Företag, you gain access to resources and knowledge within all sectors of the risk management circle. This means that different specialist groupings can be brought together in investigations, for example police expertise combined with the IT specialist's knowledge. Our experience shows that this is a strength that helps build security for our client's. confidence in us. Investigations have, in addition, a preventive and security increasing effect in organisations.

### **Preventative security**

Säkert Företag's risk analysis helps you to prevent operational interruptions, serious stoppages, criminal actions and to prevent catastrophic situations that can arise as a result of external or internal events. In other words, we find the risks and help you to eliminate or limit them and protect your company and your brand. The analysis can be fully adapted to your requirements, to your activity area, current security and your knowledge of security issues. Our experience shows that most catastrophes could have been avoided through risk analysis and measure implementation.

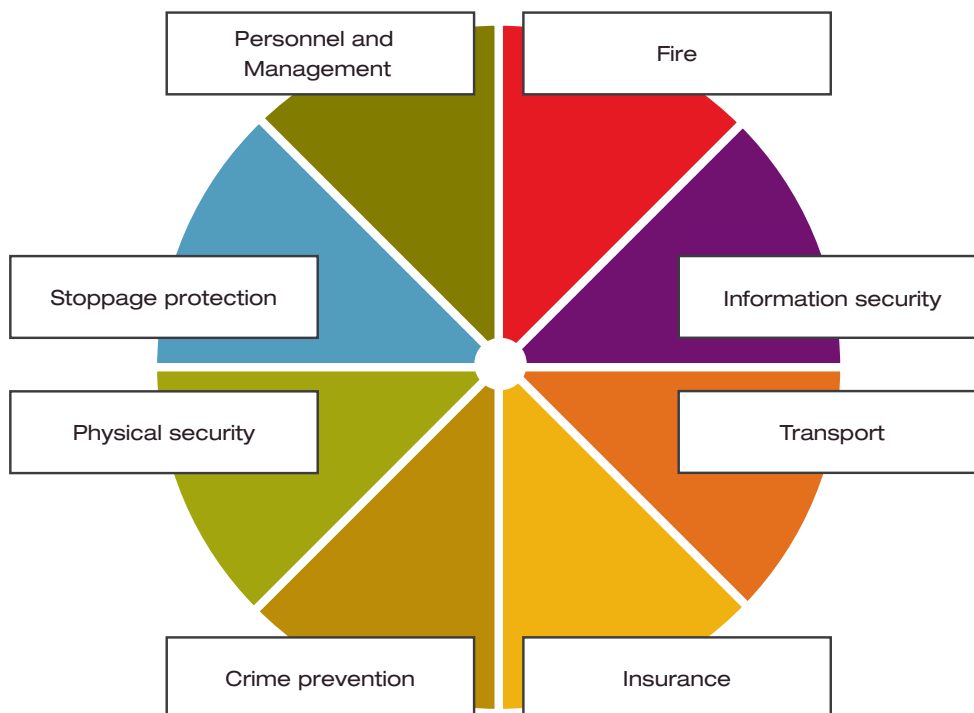

### **Training**

Our training helps you and other members of your staff become aware of the risks that exist, shows you how to avoid them and what to do if a major disaster strikes the company. We offer management training, including simulations, special courses for personnel that covers all risk and security areas, security representative training, training in information release and in handling the media. Security training is always a good investment, as it also generates commitment, common attitudes and participation.

# Risk management circle

The risk management circle is simple, secure and reliable!

The risk management circle is suitable for both medium sized and large companies and is constructed so that security work is long term. It also brings personnel closer together and generates security in daily work. Säkert Företag ensures that each area is delegated the right competence and we always offer fixed prices regardless of the assignment's nature.

### Swedish Match

“Security issues are, in Swedish Match, a highly prioritised area in the company. Säkert Företag has been engaged to primarily carry out a preliminary study of a risk and security analysis at Swedish Match in Gothenburg. The results were very satisfactory and is why we have continued to use Säkert Företag. Further assignments within Swedish Match are about to be assigned to Säkert Företag”  
Kenth Gamhed, Swedish Match

### Vin & Sprit AB

“In 1997 we engaged Säkert Företag for the first time to carry out a preliminary study at our plant in Aarhus. We found Säkert Företag’s concept to be comprehensive and well executed. We are very satisfied with both the execution and the results, which is why we continue to use Säkert Företag for training and management training games”  
Håkan Nilsson, V & S & VIN Sprit AB

### Skånemejerier

“We have engaged Säkert Företag as security consultants for a number of years. Säkert Företag has carried out risk analyses, security audits, simulations for our management teams and, not least, security training for all personnel. All assignments were carried out very professionally and in close cooperation with the managers and personnel concerned. We in Skånemejerier are very satisfied with the cooperation we have had with Säkert Företag”  
Ulf Jönsson, Skånemejerier
